

Geek Therapeutics

Certified Geek Therapist Supervisor Requirements Document (CGT-S RD)

Overview

The intent of the Geek Therapeutics Credentialing Program is to develop standards in geek culture that provides a competent practice for those wishing to utilize geekdom and for supervisors to guide supervisees through credentialing supervision with evidence based approaches and standardized processes.

To be considered for confirmation as a Certified Geek Therapist-Supervisor, applicants must meet the Geek Therapeutics standards that help incoming Geek Therapists and Specialists identify who is able to provide supervision for the current year.

This is accomplished by using geek therapy instruction, clinical experience, and supervision in a sequential three-phase approach that builds upon a completed graduate degree, and requires depth and breadth of geek therapy instruction, experience, and supervision to ensure competencies in this specialty are met and maintained.

The updated credentialing standards, established in 2023, will focus on promoting professional accountability and require ongoing professional growth and development that ultimately improve mental health services to the most vulnerable populations. Certified Geek Therapist Supervisors will be required to maintain 24 hours of continuing education through Geek Therapeutics, and additional supervision hours that consist of: 4 hours of asynchronous learning, and 8 hours of live in-person virtual instruction annually in order to maintain CGT-S credentials facilitated by Geek Therapeutics which will be offered twice a year.

Requirements

Designation
